

Coordinator: Teresa S. Welsh, Ph.D., Professor and Director, School of Library & Information Science, University of Southern Mississippi, USA

SESSION TITLE: Bibliometrics and Scientometrics

Scope & rationale: Bibliometrics is the analysis of patterns of information related to usage data, impact, or publication data in print or electronic format. Scientometrics is the “quantitative study of science, communication in science, and science policy” (Hess, 1997). This session focuses on research such as publication pattern analysis, citation analysis, and content analysis of scholarly literature, websites, databases, or collections.
