

Session Title: Metrics: Bibliometrics, Scientometrics, Webometrics, Altmetrics

Coordinator: Professor Teresa S. Welsh, Professor and Director, School of Library and Information Science, University of Southern Mississippi, Hattiesburg, USA

Scope & rationale: Bibliometrics is the statistical analysis of information related to publication patterns, impact, or usage of professional or scholarly literature in a variety of formats. More specific types of bibliometric research include scientometrics (analysis of scientific literature), webometrics (analysis of websites or web resources), and altmetrics (web-based impact analysis that includes social media). This session includes presentations on a variety of bibliometric research and formats.
